WORK EXPERIENCE

FrontEnd Engineer Sterling Bank

11/2020 - 07/2023
<https://sterling.ng/>

Lagos, Nigeria

Achievements/Tasks

- Automating the bank's corporate business credit processes, in turn, saves the bank about \$10,000 annually for software renewal and improves customer base/market share.
- Building stable and maintainable codebase using React, Azure DevOps, and Git.
- Collaborated with the business team to create new features and functionality that enhanced the swift development of required components.
- Continuous refactoring, optimization, code reviews, and bug fixes to improve the efficiency and overall user experience of the application.

Technical Team Lead Bloom Institute of Technology

02/2020 - 07/2020
<https://www.bloomtech.com/>

US, Remote

Achievements/Tasks

- Practiced test-driven development while developing each component, modules, services, and directives of the application using Istanbul, Headless browser and Jest.
- Leading a team of 20+ individuals on how to upskill themselves in developing scalable applications using the scrum methodology.
- Ensured each newly built function is properly tested and unit test coverage meets and frequently exceeded expectations.

Software Engineer Andela

04/2019 - 09/2020
<https://andela.com/>

San Francisco, Remote

Achievements/Tasks

- Orchestrated efficient mid-scale development, including testing and Continuous Integration and development.
- Collaborated with cross-functional Agile development team members to develop an inventory web solution for Tieme Ndo Ltd based on evolving client requirements.
- Designed and developed RESTful APIs for authentication, verification, and outputting of data sets.

SKILLS

HTML CSS JavaScript TypeScript React

Git Redux PostgreSQL AWS Ci/Cd

Redis Jest Docker Node.js MongoDB

Mocha/Chai React Native React Testing Library

Graphql REST Api Redux

PROJECTS

Scientia (scientiang.com) (01/2023 - 07/2023)

- Spearheaded end-to-end development of a responsive blogging site using Next.js, Express.js, and Tailwind CSS, seamlessly merging frontend and backend functionalities for an immersive user experience.
- Elevated site performance via Next.js optimizations, implemented dynamic CMS with Express.js, and enhanced SEO using SSR techniques, resulting in a high-performance, user-friendly, and discoverable blogging platform.

Gazelle - Sterling Bank (gazelle.ng) (11/2020 - 05/2023)

- Built various flows to evaluate a business, collateral, and facility to determine if you are eligible for the facility you request.
- Lead the development of the application's customer end, wrote 80% of the code base, and reviewed the rest.
- Implementation of *Advanced Encryption Standard (AES)* to improve the integrity of the application and protection of user data.

Business Hub (thebusinesshub.ng) (11/2020 - 05/2021)

- Worked on a business solution to fosters small businesses. By helping them register with appropriate authorities leads to easy access to loans and other services for a small token.
- Developed a system to audit and improve order delivery process.
